

sellify system requirements

sellify – Server-side requirements sellify (base)

| Component | Minimum | Recommended |
|---|--|---|
| CPU | Intel i3 1.6GHz or equivalent processors | Intel i5 3GHz or equivalent processors |
| RAM (available) | 6GB | 16GB |
| Supported terminal servers | Microsoft Remote Desktop | |
| Required hard disk space for programmes | 2GB | 10GB |
| Required hard disk space for documents | 10GB | Depending on size and number of customer's document stock (recommended 2TB) |
| Operating system | Windows Server 2008 (R2) / 2012 (R2) / 2016 | |
| Database | Microsoft SQL Server 2012 / 2014 / 2016 | |
| Network | TCP/IP Port 1433 must be opened on the server. | |
| Support | Remote access via internet is required for maintenance (no permanent access required). | |
| Test system | A second server is needed as a test environment (can also be a virtual machine). | |
| Software platform | Microsoft .NET Framework 4.0 | |

Version of Feb. 20, 2018

sellify system requirements

sellify – Client-side requirements sellify (base, workstations)

| Component | Minimum | Recommended |
|--|---|--|
| CPU | Intel i3 1,6GHz or equivalent processors | Intel i5 3GHz or equivalent processors |
| RAM (available) | 2GB | 4GB |
| Main memory on terminal server | 2GB per user | 4GB per user |
| Required hard disk space for sellify | 1GB | |
| Required hard disk space for documents | 2GB | 20GB or more, depending on the maximum size of customer's document stock (e.g. relevant for CAD drawings or DTP documents) |
| Screen resolution | WXVGA (1280x800) | Full HD (1920x1080) |
| Network | TCP/IP with a latency of less than 5ms | |
| Minimum bandwidth | 150kB/sec. per user | |
| Access to sellify documents directory | As a network drive or server share with write/read permissions | |
| Operating system | Windows 7 SP1 (x86 or x64) Windows 8 (x86 or x64) Windows 8.1 (x86 or x64) Windows 10 (x86 or x64) | |
| Software | Microsoft Office and Microsoft Outlook 2010 / 2013 / 2016 | |
| Multiscreen support | Yes | |
| Touch support | No | |
| Software platform | Microsoft .NET Framework 4.0 | |

Version of Feb. 20, 2018

sellify system requirements

sellify//admin – Client-side requirements (workstations)

| Component | Minimum | Recommended |
|--|---|--|
| CPU | Intel i3 1,6GHz or equivalent processors | Intel i5 3GHz or equivalent processors |
| RAM (available) | 2GB | 4GB |
| Main memory on terminal server | 2GB per user | 4GB per user |
| Required hard disk space for sellify | 1GB | |
| Required hard disk space for documents | 20 GB | Depending on size and number of customer's documents |
| Screen resolution | WXVGA (1280x800) | Full HD (1920x1080) |
| Network | TCP/IP with a latency of less than 5ms | |
| Minimum bandwidth | 150kB/sec. per user | |
| Access to <i>sellify documents</i> directory | As a network drive or server share with write/read permissions | |
| Operating system | Windows 7 SP1 (x86 or x64) Windows 8 (x86 or x64) Windows 8.1 (x86 or x64) Windows 10 (x86 or x64) | |
| Software | Microsoft Office and Microsoft Outlook 2010 / 2013 / 2016 | |
| Multiscreen support | Yes | |
| Touch support | No | |
| Software platform | Microsoft .NET Framework 4.0 | |

Version of Feb. 20, 2018

sellify system requirements

sellify//onTour – Server-side requirements

| Component | Minimum | Recommended |
|--|--|--|
| Server | runs on database server | |
| CPU | Intel i3 1,6GHz or equivalent processors | Intel i5 3GHz or equivalent processors |
| RAM (available) | 6GB | 16GB |
| Required hard disk space for programmes | 1GB | |
| Database server | Microsoft SQL Server 2012 / 2014 / 2016 | |
| Database | uses sellify database | |
| Required hard disk space for database deployment | 3x current database size | |
| Installed features on database | SQL Server Data Tools Integration Services Client Tools Backwards Compability Management Tools - Complete SQL Client Connectivity SDK | |
| Network | TCP/IP Port 1433 must be opened on the server. TCP/IP Port 4711 must be opened on the server. (Port 4711 serves as standard port for onTour, can be modified.) | |
| Operating system | Windows Server 2008 (R2) / 2012 (R2) / 2016 | |
| Software platform | Microsoft .NET Framework 4.0 Microsoft Internet Information Services 8 (complete installation) Microsoft Web Deploy Kit 3.5 | |

sellify system requirements

sellify//onTour – Client-side requirements (workstations)

| Component | Minimum | Recommended |
|--|--|--|
| CPU | Intel i3 1,6GHz or equivalent processors | Intel i5 3GHz or equivalent processors |
| RAM (available) | 2GB | 4GB |
| Required hard disk space for sellify//onTour | 2x the current database size plus the size of the document archive | |
| Network | TCP/IP connection from port 1433 to database server Data synchronization with port 4711 (Port 4711 serves as standard port for onTour, can be modified.) | |
| Access to sellify documents directory | As a network drive or server share with write/read permissions | |
| Operating system | Windows 7 SP1 (x86 or x64) Windows 8 (x86 or x64) Windows 8.1 (x86 or x64) Windows 10 (x86 or x64) | |
| Database server | Microsoft SQL Server Express version matching the version on main server | |
| Software platform | .NET Framework 4.0 | |

Version of Feb. 20, 2018

sellify system requirements

sellify//phone – Clientseitige Voraussetzungen (Arbeitsplätze)

| Component | Minimum | Recommended |
|-------------------|---|-------------|
| RAM (available) | 512MB | 1GB |
| Operating system | Windows 7 SP1 (x86 or x64) Windows 8 (x86 or x64) Windows 8.1 (x86 or x64) Windows 10 (x86 or x64) | |
| Software platform | Microsoft .NET Framework 4.0 | |
| TAPI | installed TAPI driver versions 2.x or 3.x | |

Version of Feb. 20, 2018

sellify system requirements

sellify//sync – Server-side requirements for Exchange

| Component | Minimum | Recommended |
|------------------------|---|-------------|
| RAM (available) | 2GB | 6GB |
| Operating system | Windows Server 2008 (R2) / 2012 (R2) / 2016 | |
| Software platform | Microsoft .NET Framework 4.0 | |
| MS Exchange Server | Microsoft Exchange Server 2010 / 2013 / 2016 | |
| MS Exchange Web Server | Must be installed and accessible via web address, e.g. https://mydomain.com/ews/exchange.asmx | |
| Exchange user | Impersonation right and full access to the mailbox to be synchronized | |
