

sellify Exchange Server Integration

With sellify Exchange Server Integration, your contacts, appointments, Teams-meetings and tasks are automatically synchronized between sellify and Outlook as well as Teams.

Description

With sellify Exchange Server Integration, your contacts, appointments, Teams-meetings and tasks are automatically synchronized between Outlook/Teams and your sellify solution. Also synchronization with your mobile devices is possible.

With sellify Exchange Server Integration you can synchronize your contacts, appointments and tasks in both directions - i.e. from sellify to Outlook and vice versa - or in one direction only - i.e. either only from Outlook to sellify or only from sellify to Outlook. The activity types and contacts to be synchronized from sellify to Outlook can be set individually.

Installation & configuration

sellify Exchange Server Integration is licensed once for your company and installed centrally. For the startup, a user has to be generated on the used mail server. This user is granted access to the mailboxes of the users to be synchronized.

At a glance

Error reduction through auto-synchronization

Optimal support for your sales representatives

Increase the quality of your data stock

Time saving and more efficiency in everyday work
